INFORMATION SECURITY

VSP understands that you are concerned about the security of your information, so we've instituted multiple security features and procedures to ensure that your personal information is handled safely and responsibly.

WHEN YOU REGISTER WITH US

When you become a registered member of this website, we ask you to create a personal, private user ID and password. It is your responsibility to keep these confidential:

- Do not share your user ID and password with anyone
- Never write your password on something others may see

SECURE SERVER SOFTWARE

VSP intends to ensure the security of your personal health care information. To do that we use proven Hypertext Transfer Protocol over Secure Socket Layer (HTTPS) technology. When you log into this website your user ID and password are sent over the Internet from your computer to ours using HTTPS. HTTPS encrypts your personal information before it leaves your computer, protecting it from interception while it travels over the Internet.

Once you have logged in, you can check that you are viewing your information in the secure section of our site by looking for the letters https:// at the beginning of the web site address or URL in your web browser. The "s" means secure.

Our server requires that all of the data you send to us is encrypted using these HTTPS links. If your browser does not support HTTPS links, you will receive a message indicating that your information cannot be sent because of the security risk.
